

Exploratory Testing Session Notes — nopCommerce

SESSION CHARTER

Date: June 2026
Tester: Mass Frat
Application: nopCommerce Demo Store
URL: <https://demo.nopcommerce.com>
Duration: 25 minutes
Area: Cart, Checkout and Search flows

Mission:

Investigate the cart, checkout and search features for edge cases, usability issues and unexpected behaviour that scripted tests would not find.

Tools: Chrome, Chrome Developer Tools (F12), Loom screen recording

The 10 Investigations

Investigation 1 - Extreme Quantity Values in Cart

- Add any product to the cart and go to the cart page
- Change the quantity to 999 and click enter
- Change the quantity to 0 and click enter
- Change the quantity to -1 (a negative number)
- Type abc (letters) in the quantity field

Investigation 2 - Search Edge Cases

- Search for a single letter a
- Search for special characters @#\$%&
- Copy and paste long sentences repeatedly into the search bar
- Leave the search box completely empty and press Search

Investigation 3 - Apply a Non-Existent Discount Code

- Go to the cart page and find the Gift Card or Discount Code input field
- Type a fake code: FREESTUFF2026 and apply it
- Type another fake code: 1234

Investigation 4 - Browser Back Button During Checkout

- Add an item to the cart and start checkout
- Fill in the billing address form completely
- Click Continue to go to the next step
- Press the browser back button
- Try pressing back multiple steps

Investigation 5 - Double-Click on Buttons

- On the checkout final confirmation step double-click the Confirm Order button very quickly
- Double-clicking Add to Cart on a product page

Investigation 6 - Console Error Check With DevTools

- Open DevTools (F12) and click the Console tab
- Clear any existing messages by clicking the clear icon
- Navigate through: homepage, a category page, a product page, the cart, the checkout
- Watch for red error messages after each navigation — screenshot every one you find
- Red errors are real technical bugs. Yellow warnings are worth noting too

Investigation 7 - Mobile Responsive Testing

- Open DevTools (F12) and click the Responsive Design Mode icon (phone icon)
- Select iPhone 14 Pro from the device list or set width to 390px
- Try to navigate using the mobile menu, search for a product, add to cart and reach checkout

Investigation 8 - Two Browser Tabs Simultaneously

- Open nopCommerce in two separate Firefox tabs
- In Tab 1: add a laptop to the cart
- In Tab 2: add a phone to the cart without refreshing Tab 1
- Switch to Tab 1 and look at the cart
- Refresh Tab 1

Investigation 9 - Add to Cart With No Options Selected

- Open a Desktops product that has required option dropdowns (processor, RAM etc.)
- Do NOT select any option from the dropdowns
- Click Add to Cart

Investigation 10 - Network Tab on Add to Cart

- Open DevTools (F12) and click the Network tab
- Make sure the record button is active (red circle)
- On a product page click Add to Cart
- Find the network request triggered by that action in the list
- Click on it and look at the Response tab

Notes During the Session

0:15 Started session. Navigating to cart
0:30 Investigation 1: Extreme Quantity Values in Cart.
- Qty 999: Accepted. Price calculated correctly. No max limit enforced.
- Qty 0: Item removed from cart. Displayed on new screen "Your Shopping Cart is empty!"
- Qty -1: Field reset to 1 automatically. Good behaviour.
- Qty abc: Field reset to 1. Good behaviour.
- No Update button was found. Pressing the enter key was required after each update.
2:28 Investigation 2: Search Edge Cases
- a single letter. Error shows minimum length is 3 characters.
- special characters. No products were found message.
- long repeated sentences. No products were found message.
- empty search box. Error shows minimum length is 3 characters.
4:20 Investigation 3: Apply a Non-Existent Discount Code
- Entered FREESTUFF2026. Error "The coupon code could not be found".
- Entered 1234. Error "The coupon code could not be found".
5:20 Investigation 4: App Back Button During Checkout
- Filled in billing address completely. Pressed back button.
- FOUND: Country, City, Address 1, Zip/postal code and Phone number were all deleted.
Need to re-enter each one.
7:27 - Logging as BUG-001. Screenshot taken.
8:45 Investigation 5: Double-Click on Buttons
- Order was confirmed. No errors displayed. Behaviour good.
- Add to cart. No errors and only kept 1 item. Behaviour good.
9:45 Investigation 6: Console Errors Check with DevTools
- FOUND: Each time Shopping Cart is pressed it opens a new screen for a Security check.
- Clicking the Verify you are human box was not working.
- Logging as BUG-002. Screenshot taken.
10:50 Investigation 7: Mobile view (iPhone 14 pro - 433.25px x 394.20px)
Investigation 8: Two Browser Tabs Open Simultaneously
Investigation 9: Add to Cart with No Options Selected
Investigation 10: Network Tab on Add to Cart
- Remaining tests behaved well. No error messages displayed.
