

Bug Fix Scenario (for testing purposes)

The development team has fixed a bug where the product sorting on category pages was broken. When a user selected Sort by: Price (Low to High) on the Computers category, products were not reordering - they stayed in their original random order. The fix has been deployed and it was verified that it works.

The 8 Sanity Test Cases

SA-001: Computers Category Page Loads After Fix	
Test Type: Sanity Test	
Precondition	Homepage is loaded
Steps	1. Hover over Computers in the main navigation 2. Click Desktops from the dropdown 3. Wait for the category page to load
Expected Result	The Desktops category page loads correctly showing all desktop products. The Sort by dropdown is visible at the top. No error messages appear.
Actual Result	The Desktops category page loaded correctly showing all desktop products. The Sort by dropdown was visible at the top. No error messages appeared.
Pass / Fail	PASS

SA-002: Sort by Price Low to High Works - (Core Fix)	
Test Type: Sanity Test	
Precondition	Desktops category page is loaded
Steps	1. On the Desktops category page 2. Find the Sort By dropdown (near the top of the product listing) 3. Select Price (Low to High) from the dropdown 4. Observe the product order on the page
Expected Result	Products reorder immediately showing the cheapest product first and the most expensive last. The order is clearly ascending by price.
Actual Result	Products reordered immediately showing the cheapest product first and the most expensive last. The order was clearly ascending by price.
Pass / Fail	PASS

SA-003: Sort by Price High to Low Works

Test Type: **Sanity Test**

Precondition	<i>Desktops category page is loaded</i>
Steps	1. On the Desktops category page with Sort by still available 2. Select Price (High to Low) from the Sort by dropdown 3. Observe the product order
Expected Result	Products reorder showing the most expensive product first and the cheapest last. The order is clearly descending by price.
Actual Result	Products reordered showing the most expensive product first and the cheapest last. The order was clearly descending by price.
Pass / Fail	PASS

SA-004: Sort by Name A to Z Works

Test Type: **Sanity Test**

Precondition	<i>Desktops category page is loaded</i>
Steps	1. On the same category page 2. Select Name (A to Z) from the Sort By dropdown 3. Observe the product titles
Expected Result	Products reorder alphabetically with names starting with A appearing first. The alphabetical order is correct.
Actual Result	Products reorder alphabetically with names starting with A appearing first. The alphabetical order is correct.
Pass / Fail	PASS

SA-005: Default Sort Order Restores Correctly

Test Type: **Sanity Test**

Precondition	<i>A sort filter is currently applied on the Desktops category page</i>
Steps	1. With a sort currently applied (e.g. Price Low to High) 2. Select Position (the default option) from the Sort By dropdown 3. Observe the product order
Expected Result	Products return to the default display order. The sort resets correctly without requiring a page refresh.
Actual Result	Products returned to the default display order. The sort resets correctly without requiring a page refresh.
Pass / Fail	PASS

SA-006: Sorting Works on a Different Category - Notebooks	
Test Type: Sanity Test	
Precondition	Homepage is loaded
Steps	1. Hover on Computers in the navigation 2. Click Notebooks from the dropdown 3. Apply Sort by: Price (Low to High)
Expected Result	Notebooks reorder correctly by price with the cheapest first. Sorting works on a different subcategory, not just Desktops.
Actual Result	Notebooks reordered correctly by price with the cheapest first. Sorting works on a different subcategory, not just Desktops.
Pass / Fail	PASS

SA-007: Product Count Does Not Change After Sort	
Test Type: Sanity Test	
Precondition	Desktops category page is loaded
Steps	1. On the Desktops category page note the total number of products shown (e.g. Display 3 per page) 2. Apply Sort by: Price (Low to High) 3. Check the product count again after sorting
Expected Result	The total number of products shown is identical before and after sorting. Sorting only changes the order - no products disappear or duplicate.
Actual Result	The total number of products shown was identical before and after sorting. Sorting only changes the order - no products disappear or duplicate.
Pass / Fail	PASS

SA-008: Product Detail Page Still Opens From Sorted Results	
Test Type: Sanity Test	
Precondition	Sort by Price Low to High is applied on Desktops category
Steps	1. With Sort by: Price (Low to High) applied on Desktops 2. Click on the first product in the sorted results 3. Observe the product detail page
Expected Result	The product detail page opens correctly with the product name, price, images and Add to Cart button all visible. The price shown matches what was shown in the sorted results.
Actual Result	The product detail page opened correctly with the product name, price, images and Add to Cart button all visible. The price shown matches what was shown in the sorted results.
Pass / Fail	PASS

Sanity Test Summary

Total Sanity Tests	Passed	Failed	Sanity Test Result
8	[8]	[0]	PASS
